

Haris Hodžić

Senior Frontend engineer

I'm not just another senior frontend engineer. I'm a proactive problem-solver and a dedicated advocate for exceptional user experiences. My journey in frontend development spans over 4 years, collaborating on intricate codebases and spearheading innovation within startups.

What sets me apart? It's not just proficiency in React; it's a relentless drive to elevate frontend excellence. Imagine having a developer who seamlessly bridges design and functionality, streamlining user interactions and turning complexity into elegance.

Work Experience

● Frontend Developer | Everstox

April 2022 - present

Tech stack: React / Redux / Cypress

Engaged in the development of a logistics-focused application aimed at resolving operational challenges. Within this role, I played a pivotal role in refactoring the codebase from class-based structures to more efficient and modular functional components, contributing to the design and implementation of a comprehensive dashboard and I contributed to the design and implementation of a comprehensive dashboard. This dashboard serves as a centralized hub, furnishing merchants with essential warehouse-related data. The objective is to empower merchants to make informed decisions that drive cost reduction and facilitate optimal selection of logistics partners for their inventory storage needs.

● Frontend Developer | Valens

November 2020 - April 2022

Tech stack: React / Ts / Mobx / Electron / Sip.js / MUI

I played a crucial role in the development of the Communicator project, an innovative communication application designed for organisational use.

Within this project, I was responsible for implementing essential features such as messaging, audio calls, and the integration of video calls through iframe imports. External 'Portal' app streamlined contact management, enabling users to effortlessly add both internal and external contacts for seamless communication. My work encompassed the creation of group messaging, one-on-one chat functionality, and ad hoc group discussions, enhancing the platform's versatility.

I was entrusted with overhauling the app's appearance and functionality, as the initial design was outdated. Collaborating closely with the design team, I orchestrated a complete transformation, from concept to implementation. The result was an optimised communication channel encompassing messaging, audio calls, and integrated video calls via iframe.

Frontend Developer | ScribeBrain

July 2019 – November 2020

Tech stack: React / Ts / Mobx / ReactContext /
Draft.js / Bonita

I was involved in development of a healthcare applications designed to elevate patient care and streamline medical workflows. This project included multiple applications.

One application focused on managing incoming patients, enabling doctors to record audio notes, attach textual annotations, and seamlessly communicate with scribes. Scribes accessed a separate app to review AI-generated structured notes, make modifications, and collaborate with doctors.

Additionally, I played a key role in designing a portal application that showcased our cutting-edge AI technology. This portal served as a strategic marketing tool, simplifying the process of acquiring new clients for ScribeBrain.

Each application was thoughtfully built using React.js, ensuring a seamless and intuitive user experience. My responsibilities spanned from front-end development to user experience enhancement, demonstrating my expertise in healthcare technology solutions.

● **Junior Software Developer | Arni Soft**

January 2019 – July 2019

Tech stack: Angular / .NET Core

This marked the beginning of my career, and I remain immensely grateful to Arni for providing me with a valuable opportunity. The application I contributed to encompassed the complete manufacturing lifecycle of diverse steel-based materials. This encompassed various aspects, such as inventory management, material allocation per product, personnel oversight, shipment logistics, tracking mechanisms, and more.

I appreciate your time in reviewing my CV.

I am excited about the prospect of contributing to impactful projects and welcome the opportunity to connect.

🌟 **Passionate about innovation in technology and its profound impact on industries.**

🚀 **Committed to elevating user experiences through creative solutions.**

🌍 **Eager to contribute to visionary projects that push boundaries.**
